

# Receivers Table

A listing of the possible receivers for each telescope. Currently unused as we are not collecting receiver data.

## Definition:

Column	Type	Collation	Nullable	Default
receiver_id	integer		not null	nextval('receivers_receiver_id_seq'::regclass)
description	character varying		not null	

Indexes:

```
"receiver_id" PRIMARY KEY, btree (receiver_id)
```

Referenced by:

```
TABLE "subscans" CONSTRAINT "receivers_subscans_fk" FOREIGN KEY (receiver_id) REFERENCES receivers (receiver_id)
```

## Columns:

- receiver\_id:** an auto-generated id.
- description:** and user-readable short identifier for the receiver.
