

# Requirements Definition Working Pages

These pages are collaboration pages where requirements can be discussed, clarified, and agreed on before they are formally captured in the project.

## Image & Image Set Metadata Fields

PRELIMINARY

A summary of the meta data collected for all Images and Image Sets. These were originally driven by VLASS, but is appropriate for SRDP use as well.

## SRAO Metrics Definition

PRELIMINARY

Summary of the types of metrics we want to capture as part of SRDP.

## Science Product QA System Requirements

BASELINED

Requirements for the design of a reporting system for product QA status.

## CARTA - Archive Integration

INITIAL

Development of the requirements for the integration of the CARTA viewer and the NRAO archive.

## NRAO Calibrator Database

INITIAL

Development of the requirements for a Flux Calibrator Database and service for NRAO telescopes.

## Archive Operations Tool

INITIAL

Requirements for a tool to support archive operations.

## DOIs and Data Linking

INITIAL

Requirements for Digital Object Identifiers enabling the linking of data to science papers.

## Large Projects ([Template](#))

### Realfast Product Ingestion

BASELINED

Description and definition of the ingestion of Realfast Products to the NRAO Archive.

### VLASS

INITIAL

Requirements for treatment of the VLA Sky Survey as a collection.

### VERTICO

ACCEPTED

Proposed ALMA Large Program

### VLITE and VCS

INITIAL

### North Celestial Pole Pulsar Survey

INITIAL

### ALFALFA

PRELIMINARY

Definition, requirements, and definition of the ingestion of ALFALFA data products into the NRAO Archive

### The Comprehensive VLA Survey for Black Holes in Globular Clusters (MAVERIC)
