### How to add a banner (MOTD) to the AAT-PPI website

In **/home/ssa**, create the file  
aat-nmprod.motd  
or  
aat-nmtest.motd

with **774** permissions, as in

```
-rwxrwxr-- 1 jgoldste ssa          724 Nov  9 08:22 aat-nmprod.motd*
```

and it should just magically appear upon page refresh.

*Do not mess with the splash screen* (aat-nmprod.splash).  
If you change a file by mistake, be sure to `chmod 774`

When you don't want to display the MOTD anymore, you can change the name, delete it, or reset permissions to 774.
