## 2020-01-21 Deployment

Version	DB Copy	Notes
pre-3.8.0	yes	New DA Tools, Platform for Quicklook & VLBA ingestion infrastructure

## Description

This is the initial testing release of 3.8.0, meant to provide tools to reduce the need for the use of the Legacy Archive. This release is also to facilitate heavier testing of the VLBA reingestion infrastructure updates, as well as ingestion of metadata for the cached Quicklook images from the Pilot and 1.2 epochs of VLASS.

## Known Issues

- No changes have been made with regard to the handling of weblogs for CIPL & AUDI
- Reprocessing of CIPL & AUDI runs still require the hand-removal of the error lines in order to proceed.

## 2019-08-14 Deployment

Version	DB Copy	Notes
pre-3.7.0	yes	Product system, ALMA Optimized Imaging capability

## Description

This is the initial testing release of 3.7.0, meant to support the product system, ALMA Optimized Imaging capability and ingestion of collections for realfast and VLASS. There are many new features to test, but be aware there were changes to the request handler to support the product system, so testing authentication and authorization of public and private data is critical, along with testing all of the delivery permutations that worked in the last release (with tar, without tar, local delivery, standard delivery, basic MS, CMS and so on).

## Known Issues

- Ingestion of calibrations and images is still being worked on and shouldn't be attempted right now, we are testing ingestion of execution blocks (VLA, VLBA and ALMA).
