Introduction

The AAT/PPI (Archive Access Tool/Pipeline Processing Interface) is designed to be a replacement for the NRAO's current archive tool (<https://archive.nrao.edu>) that gives astronomers the ability to utilize the NRAO's processing clusters to manipulate observation data using CASA. This release provides the additional capability to download individual VLBA correlations.

Additional features include:

- VLBA
- Un-nesting of EVLA filegroup structure
- Modified support for VLBA proprietary period not based on last observation time

New Features

- support for downloading VLBA individual correlations
